

Programme	: B.Tech.	Semester	: Winter24-25
Course	: BCSE203E: Web Programming Lab	Slot	: TE1/TE2
Faculty	: Dr. LM Jenila Livingston	Marks	: 10

Name: Sara Arora

Regisiter no. 23BCE5036

## Exercise-8

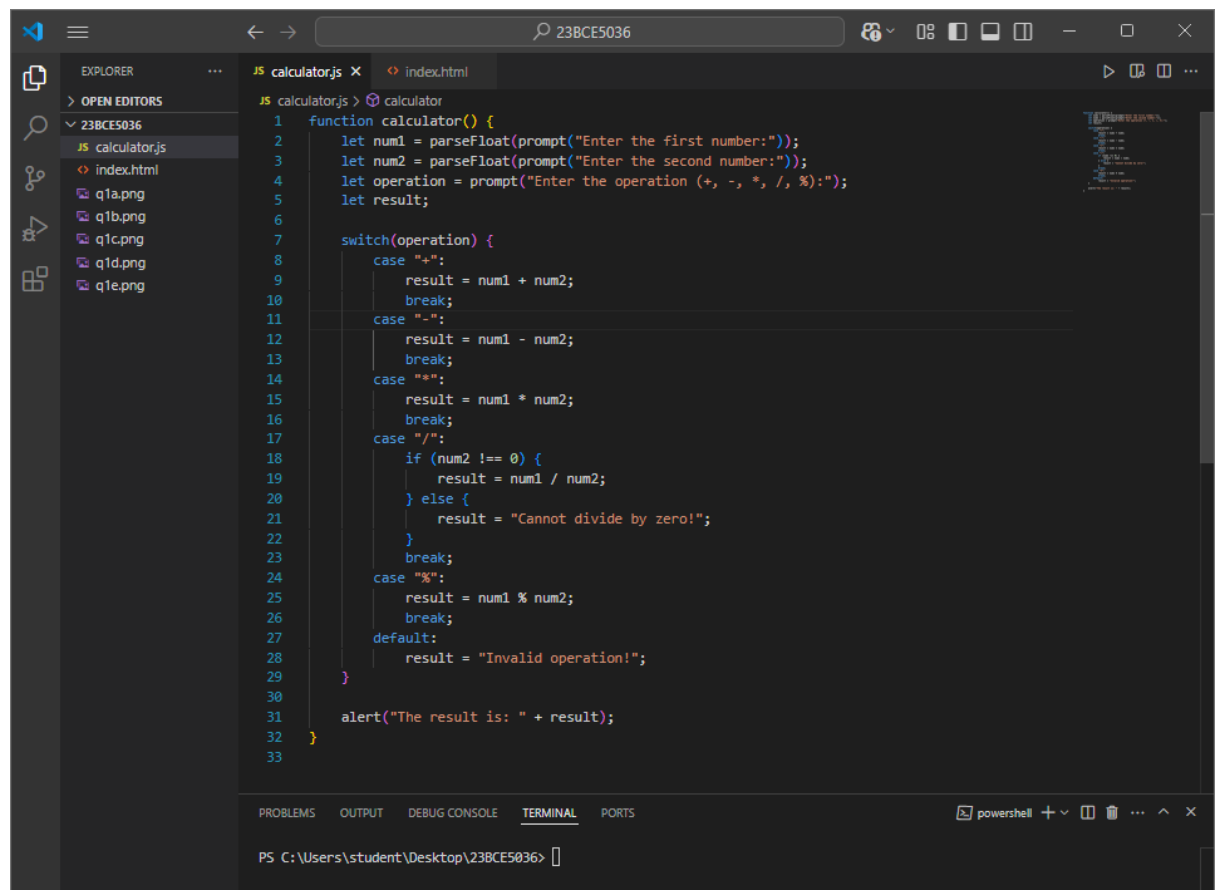

Ques 1:

```

1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <title>23BCE5036</title>
7  </head>
8  <body>
9      <h1>Basic Calculator</h1>
10     <p>Open the browser console and type <code>calculator()</code> to run the calculator.</p>
11     <script src="calculator.js"></script>
12 </body>
13 </html>

```

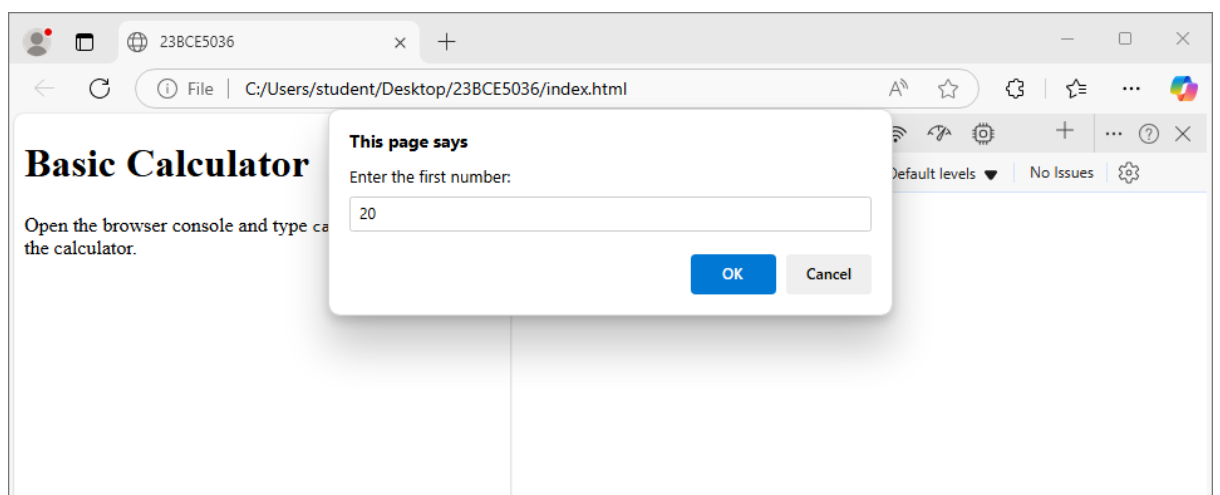

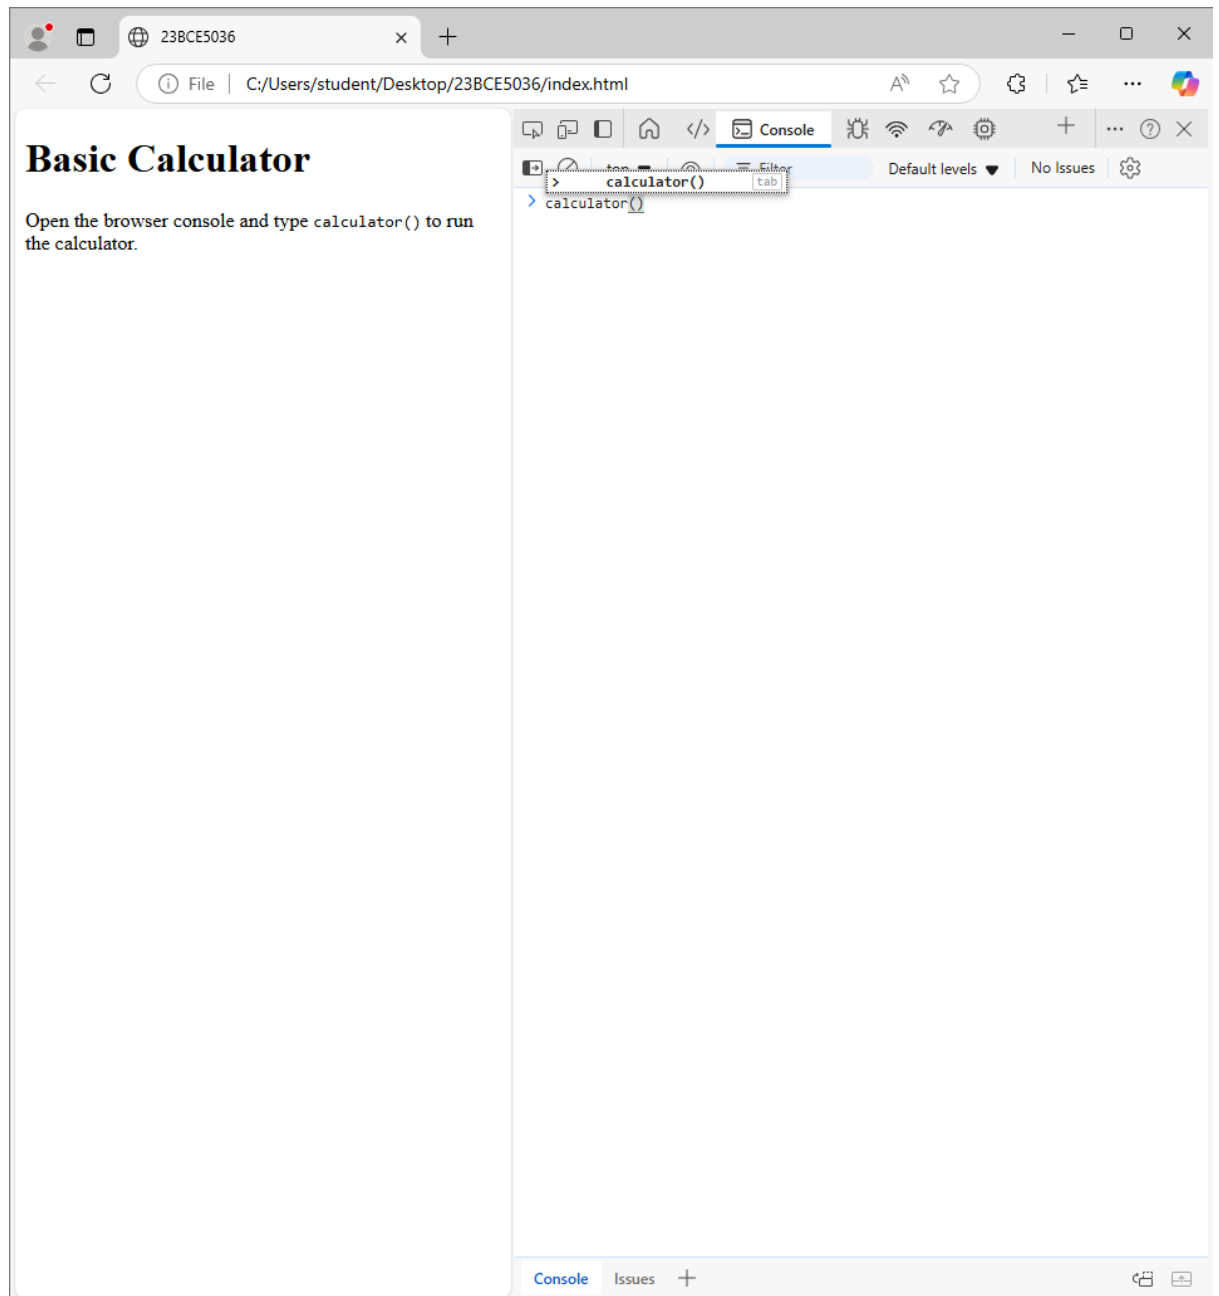

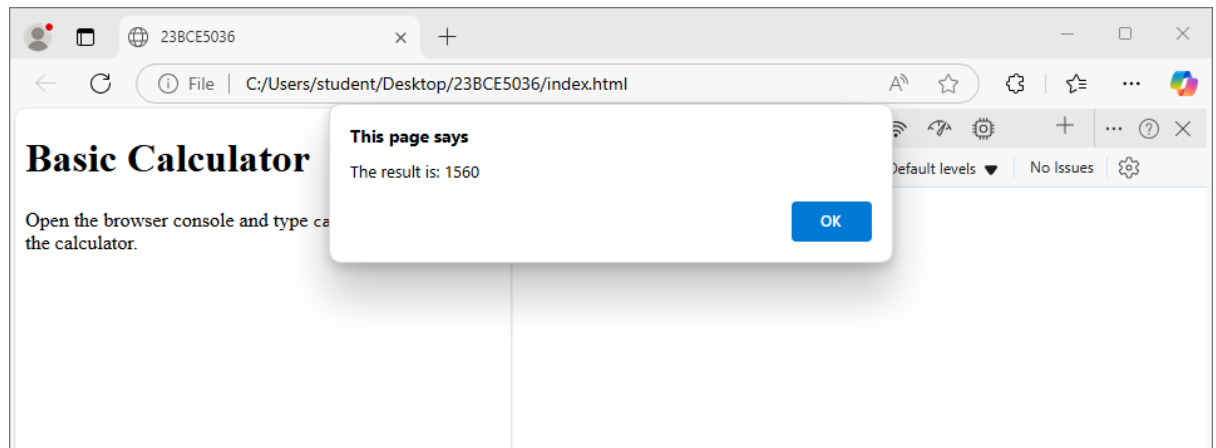

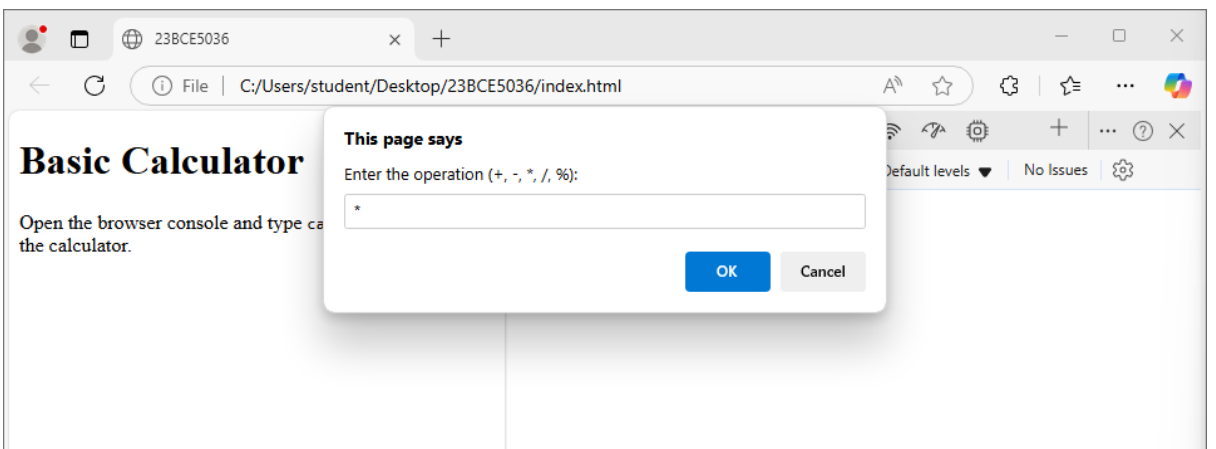

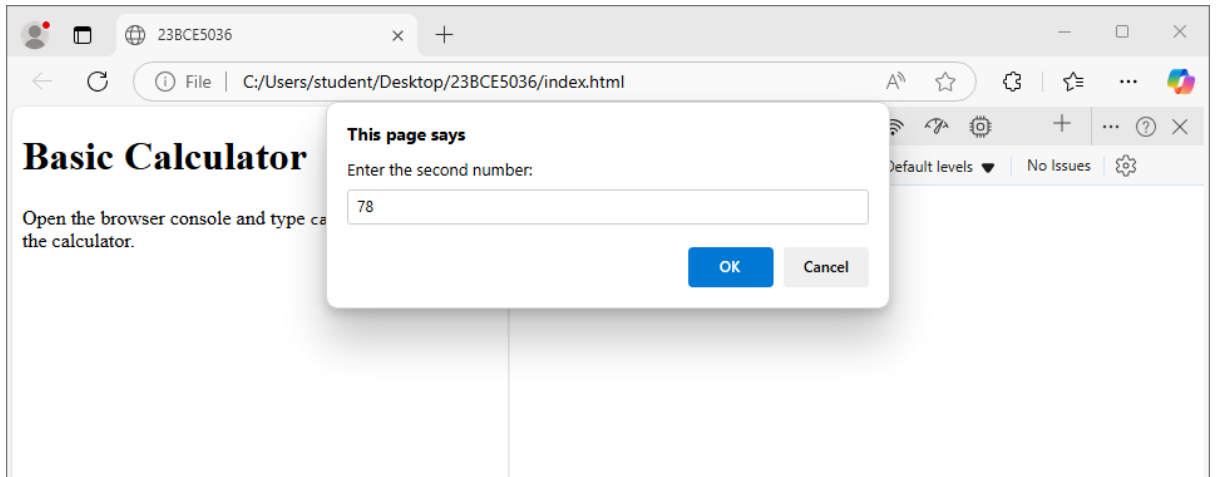

```

1  function calculator() {
2      let num1 = parseFloat(prompt("Enter the first number:"));
3      let num2 = parseFloat(prompt("Enter the second number:"));
4      let operation = prompt("Enter the operation (+, -, *, /, %):");
5      let result;
6
7      switch(operation) {
8          case "+":
9              result = num1 + num2;
10             break;
11          case "-":
12              result = num1 - num2;
13              break;
14          case "*":
15              result = num1 * num2;
16              break;
17          case "/":
18              if (num2 !== 0) {
19                  result = num1 / num2;
20              } else {
21                  result = "Cannot divide by zero!";
22              }
23              break;
24          case "%":
25              result = num1 % num2;
26              break;
27          default:
28              result = "Invalid operation!";
29      }
30
31      alert("The result is: " + result);
32  }
33

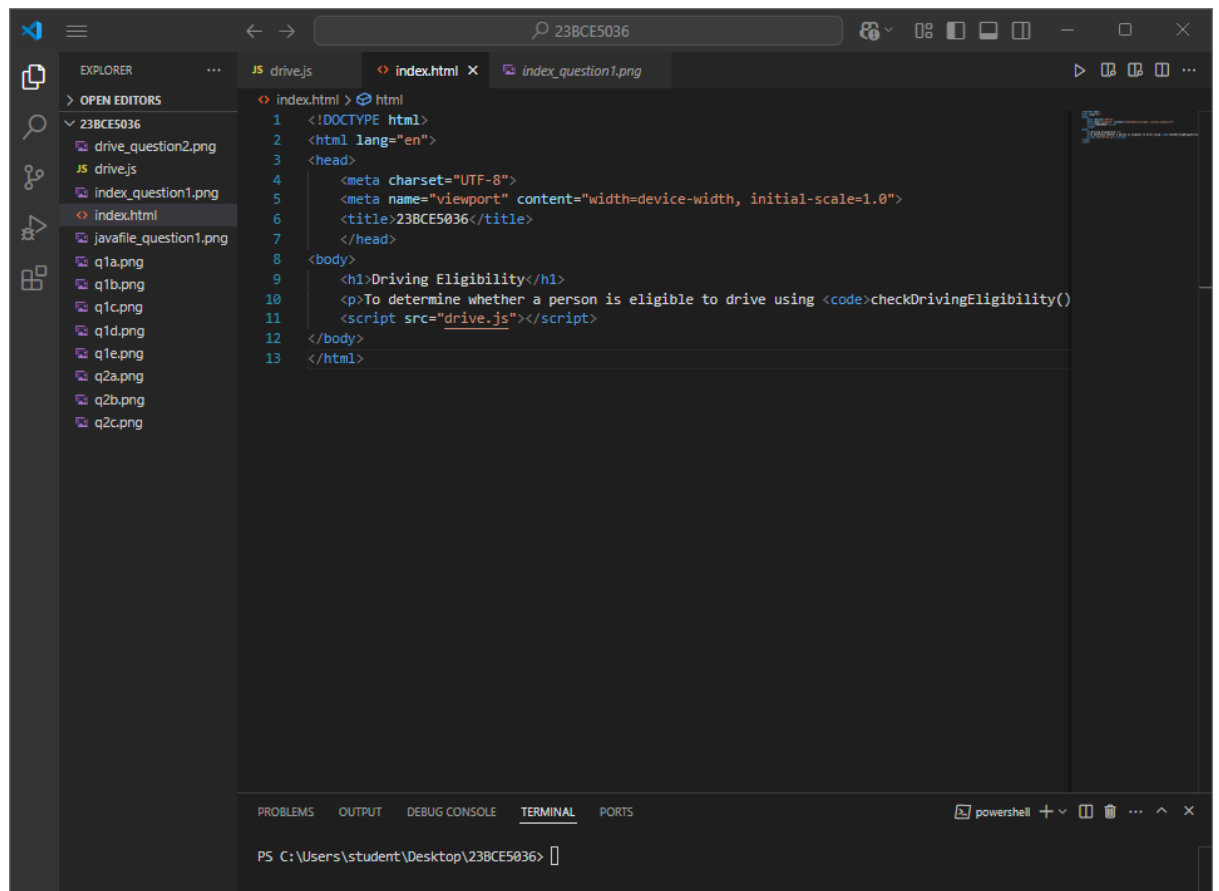

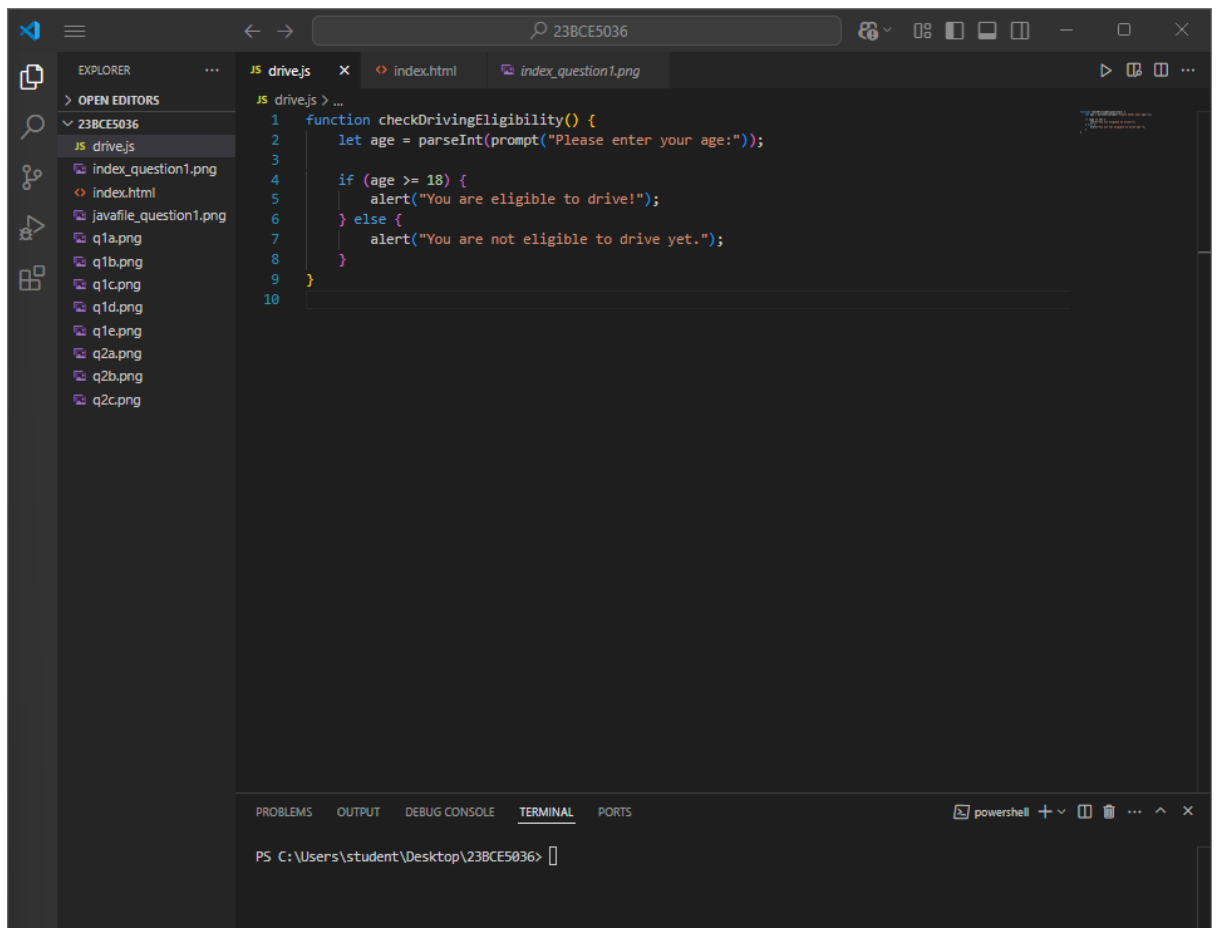

```

### Question-3

The screenshot shows the Visual Studio Code editor with the Explorer sidebar on the left. The Explorer sidebar displays a file tree for a project named '23BCE5036'. The file tree includes several image files (e.g., drive\_question2.png, index\_question1.png, index\_question2.png, javafile\_question1.png, q1a.png, q1b.png, q1c.png, q1d.png, q1e.png, q2a.png, q2b.png, q2c.png, q3a.png, q3b.png, q3c.png, q3d.png) and a JavaScript file named 'status.js'. The 'status.js' file is selected and its content is displayed in the main editor area. The code defines a 'Status' function that prompts the user for a registration number and asks if they are a student. It then uses an 'if' statement to display an alert message based on the user's response.

```
1 function Status() {  
2     let regNumber = prompt("Please enter your registration number:");  
3     let isStudent = confirm("Are you a student?");  
4  
5     if (isStudent) {  
6         alert("Registration number " + regNumber + " is confirmed for a student.");  
7     } else {  
8         alert("Registration number " + regNumber + " is not confirmed for a student.");  
9     }  
10 }  
11
```

The bottom of the editor shows the 'TERMINAL' tab with a PowerShell prompt: `PS C:\Users\student\Desktop\23BCE5036>`.

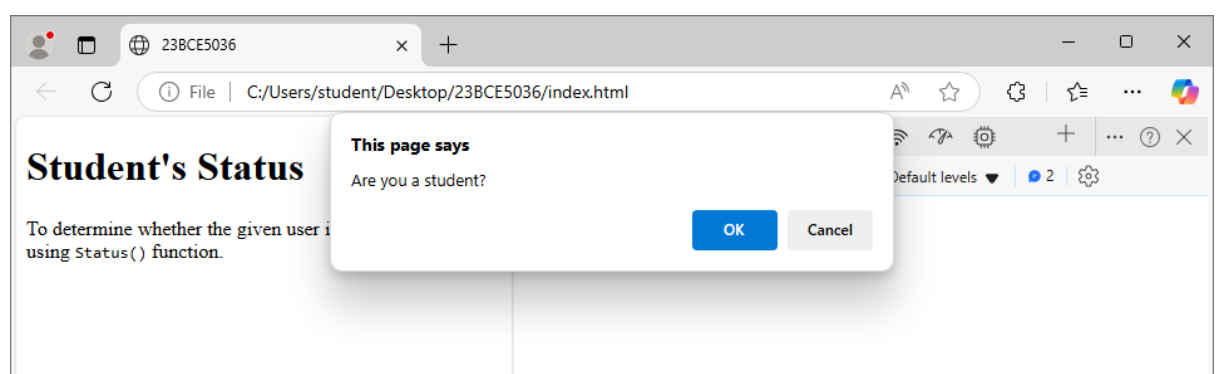

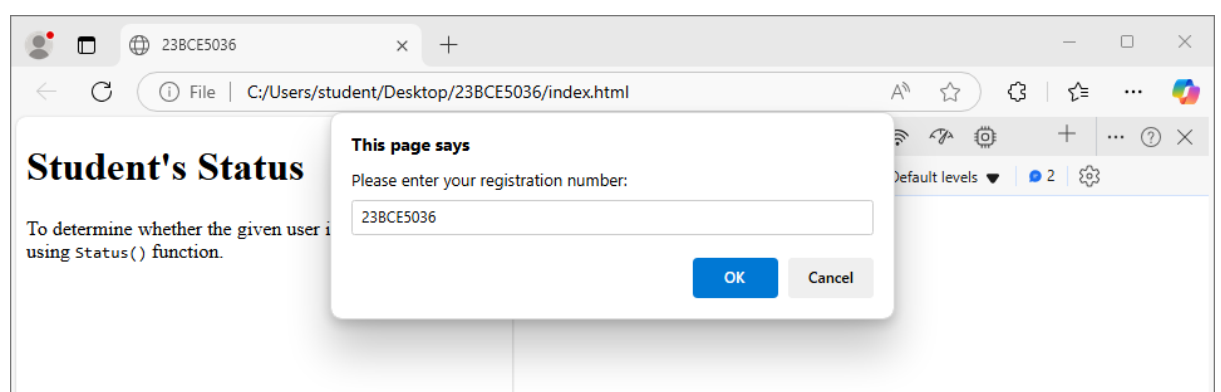

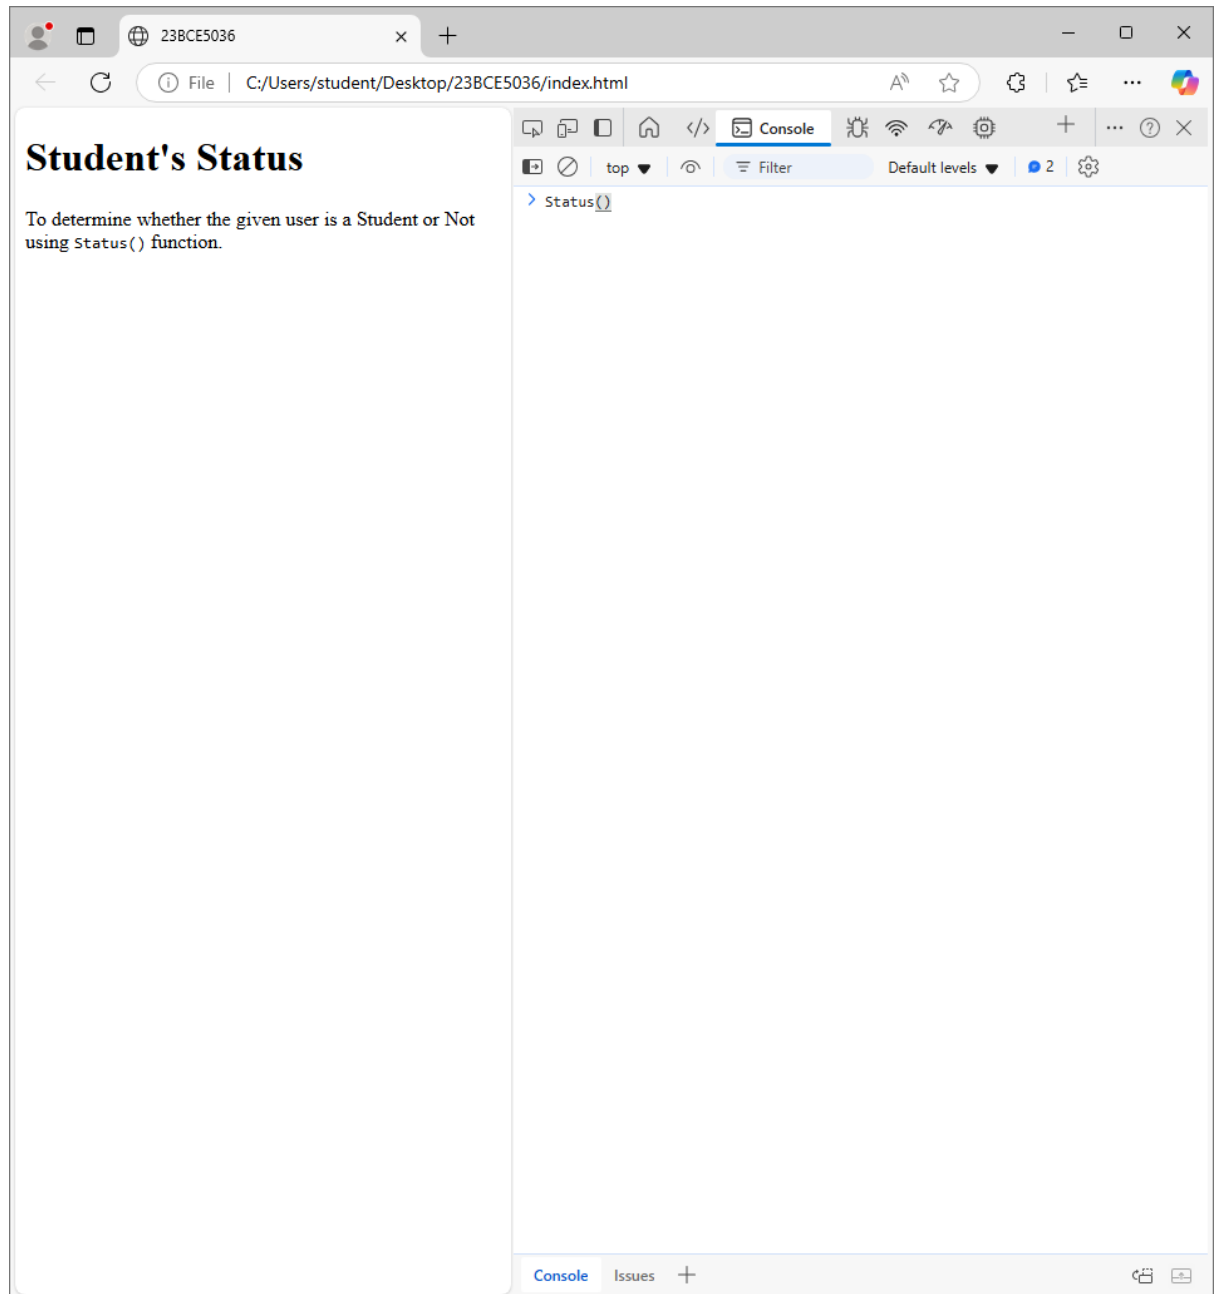

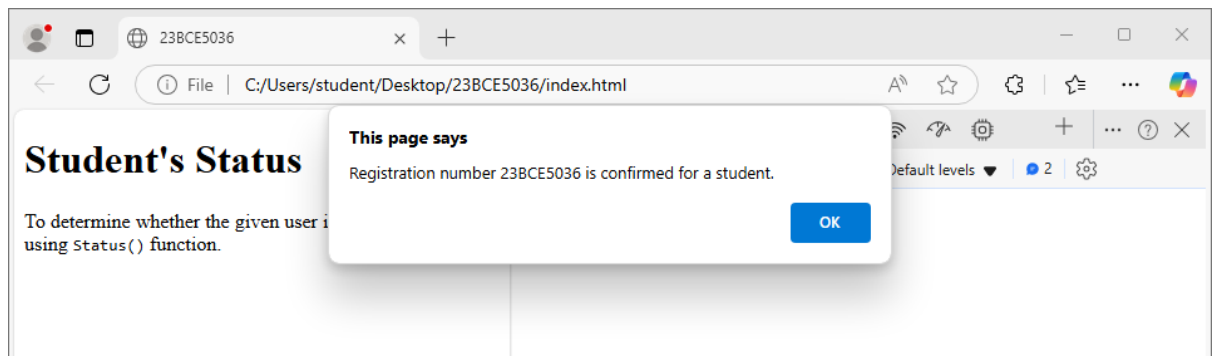

The screenshot shows the Visual Studio Code editor with the Explorer sidebar on the left. The Explorer sidebar displays a file tree for a project named '23BCE5036'. The file tree includes several image files (e.g., drive\_question2.png, index\_question1.png, index\_question2.png, javafile\_question1.png, q1a.png, q1b.png, q1c.png, q1d.png, q1e.png, q2a.png, q2b.png, q2c.png, q3a.png, q3b.png, q3c.png, q3d.png) and a JavaScript file named 'status.js'. The 'index.html' file is selected and its content is displayed in the main editor area. The code is an HTML document that includes a script tag to load the 'status.js' file. The body of the document contains a heading 'Student's Status' and a paragraph explaining the purpose of the script.

```
